---

This program is designed to make an employee's move successful and efficient. Working directly with preferred household goods providers, our Global Account Coordinators monitor every move verifying each stage is handled by professional crews, from packing and loading at the home or host location, to delivery at final destination.

Corporate/Employee Benefits:

- Ensures all home and host requirements are understood
- Reduce shipping costs through Capital Relocations quantity discounts
- Single point of contact for all aspects of the move
- Reduce stress and allows the employee and family to focus on preparations for their relocation
